

CableSoft ADT HL-7 Interface

- ◆ The HL-7 ADT (Admit Discharge Transfer) interface is available as a program module that works with the CableSoft Site Server.
- ◆ The HL-7 interface provides the hospital's ADT computer with the patient's TV order and billing information. It also allows the ADT computer to direct the patient's TV status.
- ◆ Patient TV service follows the patient automatically when the ADT sends patient bed transfer info to the HL7 interface.
- ◆ HL-7 is a hospital industry standard protocol to control all types of peripheral devices and systems in hospitals.
