

Patient Self-Activation by Phone – Cablesoft Voice

The patient dials a local extension. The CableSoft Voice PC answers the call and talks the patient through the simple ordering process. It then directs the the Addressable System to provide the ordered Cable TV service on that patient's TV.

Patient Self-Activation by Phone – Modular Software Architecture

Here the CableSoft Voice PC is at a different location than the CableSoft Site. Software modules can run in the same PC or in 2 different PC's linked by TCP/IP.
